PROFILE

Python Developer & AI Trainer with **4 years of experience** in software engineering, specializing in **Data Structures, Algorithms**, and **Data Science**. Proven track record of solving **500+ complex algorithmic problems** on LeetCode/ Codeforces, demonstrating the deep understanding of Python logic required for RLHF and AI training. Experienced in cleaning and analyzing complex datasets (Solar Radiation Project) and documenting technical workflows. Self-driven freelancer capable of debugging AI-generated code and delivering "Gold Standard" solutions in Python and Docker environments.

EDUCATION

Software Engineering May 2022 – Present
Adama Science And Technology University Adama, Ethiopia
- **Coursework:** Full Stack Web Development, Algorithms and Data Structures, Object-Oriented Programming, and Java.

A2SV Apr 2024 – 2025
Africa to Silicon Valley Adama, Ethiopia
- **Elite Problem Solving:** Solved **500+ algorithmic problems** on LeetCode and Codeforces, consistently optimizing for time (Big O) and space complexity.
- **Technical Mentorship:** Regularly explain complex algorithms (DP, Graphs, Trees) to peers, refining the ability to break down logicdirectly applicable to **training AI models**.

PROFESSIONAL EXPERIENCE

Back-end Developer Nov 2024 – present
Intertechub Addis Ababa, Ethiopia
- Specializing in **backend development** using Node.js, Express.js, and MongoDB to design and implement **scalable APIs** and **optimize database** performance.
